

### **About US**

Refash is an innovative hybrid retailer that integrates both e-commerce and physical stores into one fashion marketplace. Refash sets out to connect women's closets by making it extremely convenient for them to clean out their closet and shop for quality like new clothing in a manner that has never been done in the region before.

### **Our Views About HR & Talent**

We believe recruiting the right people is extremely critical as only a good team can move fast, can go far.

### **Students' Feedback**

Students who interned with us felt the internship was challenging and fulfilling – the students are given opportunities to work across multiple departments and disciplines to allow a greater insight to the overall operations of the retail industry.

### **How have we collaborated with IHLs**

We have collaborated with several IHLs to offer internships. These IHLs range from the various polytechnics and universities both government and private. We also have had interns who later on continued to stay on as full-time team members.
