

About US

Founded in October 2013 on the notion that bags can go beyond functionality to become a medium for storytelling, evoking the same emotions as our favourite stories, Gnome & Bow (Tyron Singapore Pte Ltd) became a reality by harnessing the power of crowdfunding, raising over \$30,000 in 2 weeks to become the largest fashion crowdfunding campaign of that time. In a span of less than 5 years, we are now stocked in 9 countries with over 40 points of sales. We are also a finalist for Collaboration of the Year 2016 and Fashion Designer of the year 2017.

Our Views About HR & Talent

We are on the hunt for driven and passionate individuals who are keen to join us on the journey to take Gnome & Bow to an international level. Core functions we are looking for are marketing and public relation strategists, social media managers, graphic designers, photographers, merchandisers, sales and business development mavens. As with all start-up journeys, it will be tough, you will have to work hard (and smart), but we guarantee it will be fulfilling and of epic proportions.

Students' Feedback

Students who interned with us felt the internship was intensive – the interns are given opportunities to work across multiple departments and disciplines which provided a greater insight into startups in the retail industry.

How have we collaborated with IHLs

Through the SME Talent Programme, we have worked with interns from Temasek Polytechnic's School of Design to provide them with a workscape that touched on the core competencies of what they have learnt in school and applied them to real life.
